“ To family and friends of Paul, I am Shannon, Paul's neighbor. I looked forward to seeing paul each day when he walked his beloved shrek. He was the most friendly, kind, thoughtful, and generous man I have met in quite some time. Even when he had little time to talk while on his break, he still made sure to chat for a minute. He had me over and showed me the beautiful home he had and we talked about getting together to play cards. He would always ask how my family was, let me love on his doggy, and was an outstanding person to know. He talked about his family to me many times, tolde he was building a little motorcycle for his grandson and his grand daughter was close to my children's age so we had planned to get them together to play. He brought joy to me daily. Every single day. I am so sorry for your loss. I knew paul for the several months he lived on elm street, and he became someone I considered a great friend and a person who I trusted to treat anyone he knew with the most respect and kindness. Paul was certainly one of a kind. He didn't deserve this. Not my buddy... Its a tragic thing that he left us now, I pray for your family in the loss of this terrific man. There won't be anyone who would ever compare to him for me... It's just not going to be the same around here.. My condolences god bless you just know he was lobed by ALL the people who met him.

“ I'm very sadden to hear this news, I work at the kangaroo and he always came in about every day. He was very cheerful and could put a smile on my face. When I think of him I think of his dark full head of hair. He always say I'm going to work, or tell me he was getting off and going home to relax. His family is in my thoughts and prayers.

“ I first met my buddy Paul in September 1979 when we both started Rochester Tooling and Machining Institute. From the first day in school we became friends and quickly became competitive in who was going to finish the school projects first. (School projects where tooling we had to manufacture over an 8 month period and where going to need once we finished school like 1,2,3 blocks , angle plate , sine bar , grinding vice etc.) Paul finished first but we where neck and neck all the way . We finished our projects so fast all we did was help other students to finish their projects. After we graduated we both ended up working at Micro Instruments and where inseparable. Even my own sibilings where jealous of him and asked why do I prefer to hang with him instead of them. Even after being separated for so many years once I mentioned his name to my family they knew exactly who he was and how close we where. I thank GOD that at least I got to talk to him less than a month ago and he was planning to bring his bike here to Rochester so we can go riding , yet this just makes it hurt worst
